

MR. FARMER

There never was a more opportune time to enter the dairy business.

Feed prices are declining but milk prices are holding firm.

It will take years to bring the milk cow population back to normal.

No business you can enter offers you the safety of your investment and such promise of returns.

NOTES FROM THE NEWS.

Charles V. Keeler of Winamac, Ind., paid \$100 for a hog at Canonsburg, Pa. The porker had just swallowed Keeler's \$200 watch, which slipped from his pocket. A Winamac butcher will explore the porcine interior to retrieve the timepiece.

A rural mail carrier at Barwell, S. C., had in his parcel load a nine pound liver pudding, two babies and a wood en leg when he was attacked by a wildcat. He used the wooden leg to vanquish the cat and saved babies and pudding unharmed.

Montclair, N. J., leads the egg contest. A Staten Island Wyandotte started it with a double egg, one inside the other, shells and all complete. Then a jealous Brooklyn Leghorn cackled and so egg nine inches long and six and a half inches in diameter was added to the exhibit. But the wise Plymouth Rock owned by Charles Poeckl of Montclair whitened and now enters the list with a Spanish dumbbell egg, two perfect eggs joined by a shell tube an inch long.

TO STOP HUMPBACK GROWTH.

Albee Operation Successfully Performed in New England.

Salem, Mass.—Dr. Harvey F. Newhall of Lynn at the Salem hospital performed what is known as the "Albee operation" for prevention of humpback from tuberculosis of the spine.

The operation consists in grafting a piece of bone into the spine so the formation of a spurious "knuckle," which causes humpback, will be avoided.

This operation was first performed by Dr. Albee of New York, but has been performed in New England only once previous to the present case.

In the operation the spurious processes of the vertebrae above and below the site of the disease are split longitudinally, and a piece of healthy bone is grafted into the groove.

The new method replaces an older one which required the use of a plaster jacket for two years.

BANDITS HAD FALSE HOOFS.

Ingenious Contrivances Are Found Near Edge of a Swamp.

Long Beach, Cal.—What is believed to have been a safe blowers' cache, discovered at the edge of a swamp near here, yielded several ingenious contrivances apparently intended to divert pursuit after the commission of a crime.

They were a pair of imitation horse hoofs carved out of pine and fitted with straps so that they could be adjusted to a pair of shoes; an imitation cow's hoof fastened to a cane evidently was intended to be used in conjunction with the others to help give the impression of a man on horseback driving a cow.
